# WARNING

To prevent fire or shock hazard, do not expose the unit to rain or moisture.

This symbol is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

## CAUTION:

TO PREVENT ELECTRIC SHOCK, DO NOT USE THIS POLARIZED AC PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

When using TV games, computers, and similar products with your VIDEO TV, keep the brightness and contrast functions at low settings. If a fixed (non-moving) pattern is left on the screen for long periods of time at a high brightness or contrast setting, the image can be permanently imprinted onto the screen. These types of imprints are not covered by your warranty because they are the result of misuse.

### Note to CATV system installer

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building as close to the point of cable entry as practical.

Use of this VIDEO TV receiver for other private viewing of programs broadcast on VHF or UHF or transmitted by cable companies for the use of the general public may require authorization from the broadcaster/cable company and/or program owner.

Do not use this VIDEO TV if moisture has condensed, such as on its CRT, otherwise it may cause malfunction. In this case, leave the VIDEO TV unused until it gets dry.

# Precautions

## Safety

- Operate the VIDEO TV only on 120V AC.
- One blade of the plug is wider than the other for safety purposes and will fit into the power outlet only one way. If you are unable to insert the plug fully into the outlet, contact your dealer.
- Should any liquid or solid object fall into the cabinet, unplug the VIDEO TV and have it checked by qualified personnel before operating it any further.
- Unplug the VIDEO TV from the wall outlet if you are not to going to use it for several days or more. To disconnect the cord, pull it out by the plug. Never pull the cord itself.

## Installing

- To prevent internal heat build-up, do not block the ventilation openings.
- Do not install the VIDEO TV in a hot or humid place, or in a place subject to excessive dust or mechanical vibration.

## Cleaning

Clean the VIDEO TV with a soft dry cloth. Never use strong solvents such as thinner or benzene, which might damage the finish of the cabinet.

## Repacking

Keep the original carton and packing materials to use for safe transport of your VIDEO TV in the future.

If you have any questions or problems concerning your VIDEO TV, please contact your nearest Sony dealer.

This VIDEO TV receiver provides display of television closed captioning in accordance with 15.119 of the FCC rules.

## Information

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

#### WARNING

Batteries may explode if mistreated. Do not recharge, disassemble, or dispose of in fire.

### Instalilling Battery

- 1 Remove the battery compartment cover (Rear of commander).

- 2 Insert one AA Battery (R6) being careful of the correct polarity.

#### Battery life

Under normal operation, the battery will last up to a half of year. If the Remote Commander does not operate properly, the battery might be exhausted. Replace it with new one.

#### To avoid damage from possible battery leakage

Remove the battery if you do not plan to use the Remote Commander for a fairly long time.

# Connecting TV Antenna/Cable

Although you can use either an indoor or outdoor antenna with the VIDEO TV, an outdoor antenna will provide you with better picture quality. You can receive cable TV by connecting a cable supplied by your local cable company.

## Connecting VHF, UHF or VHF/UHF Combination Antenna, or CATV Cable

### 75-ohm coaxial cable (round)

- 1 Check your antenna cable type and prepare the end of the cable using the F-type connector.

Attach an F-type connector (not supplied).

- 2 Plug the connector into the VHF/UHF terminal at the rear of the VIDEO TV.

### 300-ohm twin-lead cable (flat)

- 1 Check your antenna cable type and prepare the end of the cable using the 300-ohm twin-lead cable.

Attach the supplied antenna connector.

- 2 Plug the connector into the VHF/UHF terminal at the rear of the VIDEO TV.

\* Most combination antennas are equipped with a signal splitter. Remove the splitter and attach the appropriate connector.

## Connecting Both VHF and UHF Antennas

Use the EAC-66 U/V mixer (not supplied).

- 1** Prepare the VHF antenna end using the appropriate connector (p. 8).
- 2** Connect the cables to the mixer.
- 3** Attach the mixer to the VHF/UHF terminal.

### When the U/V mixer is used

Snow and noise may appear in the pictures when viewing cable TV channels over 37 ( $W + 1$ ).

### Note

For better picture quality, we would recommend you to connect an outdoor antenna.

# Using the Timer-Activated Functions

## Setting the Clock - AUTO CLOCK SET

RM-Y138/W

### Notes

- The clock cannot be set automatically if you don't receive a channel that carries a time signal in your area. If so, set the clock manually (pp28-29).
- If there are only a few channels in your area that carry time signals, setting the clock automatically may take up to about 30 minutes. If nothing happens even after you wait about 30 minutes, set the clock manually.
- The menu disappears automatically if you don't proceed for more than one minute.

Before you use the timer feature for recording program, you need to set the current time and date.

Some TV and cable channels have started to transmit time signals with their broadcasts. Your VIDEO TV can pick up this time signal to automatically set the clock. After completing the steps below, when you turn off the VIDEO TV, it will automatically search for a channel that carries a time signal and set the clock. The Auto Clock Set feature only works if a channel in your area is broadcasting a time signal. If broadcasters in your area are not yet sending time signals, set the time manually (PP28 - 29).

Clock setting is necessary also to use ON/OFF TIMER, CHANNEL BLOCK, Timer Recording and VCR Plus Recording.

# Playing Back a Video Tape

## Inserting a Video Cassette

- 1 Insert a video cassette with the arrow mark facing upwards.

- 2 Gently press the center of the front side of the cassette until the mechanism draws it into the compartment.  
When the cassette has been inserted, the  / STAND BY indicator lights and the VIDEO TV turns on automatically.

### Note

When you insert a cassette without a safety tab, playback starts automatically (AUTO PLAYBACK function).

### Ejecting the cassette

Press EJECT .

You can also eject the cassette when the power is off.

### Protecting your cassette against accidental erasure

The cassette is provided with a safety tab to protect against accidental recording. Break off the safety tab with a screwdriver or other suitable tool.

If the safety tab is removed, the cassette will be ejected when you try to record on the cassette.

RM-Y138/W

Safety tab

## Playing Back a Video Tape

To record on a cassette with the safety tab broken off, simply cover the tab hole with adhesive tape.

### Maximum recording time of a tape

The quality of tape you use greatly affects record/playback quality and the life of the VIDEO TV. Use only cassette tapes that have the official VHS logo.

High-grade tapes give the best results, especially at the EP speed. They also have a better oxide coating that helps prevent dirty video heads. Although T-160 tapes offer the longest recording time, they contain thinner tape that is more likely to stretch or cause tape jams. We suggest that you use T-120 or shorter tapes.

Recording in the SP or EP mode is possible with this unit. When recording, select the desired recording mode (SP or EP) with TAPE SPEED on the Commander. During playback, the unit automatically detects the recording format, and then plays back the tape in the appropriate mode.

The following chart shows the maximum recording times for T-60, T-120 and T-160 tapes at the recording speeds as below.

Speed	T-60	T-120	T-160
SP	1 Hour (60 Minutes)	2 Hours (120 Minutes)	2 2/3 Hours (160 Minutes)
EP	3 Hours (180 Minutes)	6 Hours (360 Minutes)	8 Hours (480 Minutes)

Playing back a video tape in the LP mode is possible but recording in this mode is not possible with this unit.

## Playing Back a Prerecorded Cassette Tape

- 1 Insert a prerecorded cassette into the tape compartment. The VIDEO TV automatically turns on.

### Note

When playing back rental tapes, select NOISE REDUCTION:ON in main menu image detail improves.

- 2 If playback does not start, press PLAY ►. The tape plays back at the speed at which was recorded.

RM-Y138/W

### To stop playback

Press STOP ■.

### To stop playback for a moment

Press PAUSE ||.

||► appears on the screen and image will stop on the screen.

To resume playback, press PAUSE || or PLAY ►.

► appears on the screen.

### When the tape is played back to the end

The tape is automatically rewound to the beginning (auto rewind). The power remains on.

### To rewind the tape to its beginning and to playback automatically (Auto Playback Function)

In the main menu, press △+ or ▽- to select SET UP during playback or stop mode and then press RETURN. And press △+ or ▽- to select AUTO REPEAT and then press RETURN. By using △+ or ▽-, select AUTO REPEAT to ON.

## Variable Speed Playback

You can enjoy playing back pictures in variable speeds on the VCR.

### Still Picture

During playback mode, press PAUSE ||. To resume normal playback, press PLAY ► or PAUSE ||.

### Notes

- No sound accompanies the picture, which may be unstable or have video "noise" in it. This is normal.
- If the VCR is left in the pause mode for more than about 5 minutes, the VIDEO TV will be in playback mode automatically.

## Playing Back a Video Tape

---

### To see a slow motion (Slow Picture)

Press -SLOW+ during playing back.

---

### To advance the picture frame by frame (Frame Picture)

Press FRAME  during Still Picture.

---

### To advance the tape rapidly

While the tape is being played back, pressing FAST FORWARD  will move the tape forward at high speed so you can see the picture and choose where to stop. When you do this,  appears on the screen.

If you release the button, the VCR will return to normal playback.

When tape is not being played back and the VCR is in the stop mode, pressing FAST FORWARD  winds the tape forward at very high speed without displaying the picture.

When you do this,  appears on the screen.

You can stop the forward running of the tape at any time by pressing STOP .

If during the operation, the tape rewinds forward to the end, the machine will automatically stop and then rewind the tape back to the beginning again.

By pressing X2, you can now run through a tape at twice normal speed to find the exact place you want. Revert to normal speed by pressing PLAY .

---

### To rewind the tape rapidly

If you press REWIND/REVIEW  while the tape is being played back, you can play the tape backwards to find a particular spot. When you do this,  appears on the screen and the tape will be rewound at very high speed.

At the end, STOP appears on the screen and invite you to press PLAY .

---

## Viewing TV Programs During Tape Playback

While a tape is being played, you can switch to watching TV broadcasts.

Press STOP .

The VIDEO TV returns to normal TV reception mode.

## Playing Back a Tape Recorded on Another VCR

When playing back a tape recorded on another VCR, there might be some picture noise.

Tracking ensures that the tape is correctly aligned with the playback head. It only works in the "playback" mode and its principle purpose is to minimize picture shake and what is called "noise" (fuzzy lines across the picture during playback and still picture).

RM-Y138/W

It is adjusted either automatically or manually.

### Automatic tracking adjustment function

When playback starts, the auto tracking automatically adjusts the picture. "AUTO TRACKING" flashes for 5 seconds.

The automatic tracking control is activated in the following conditions:

- When the cassette is inserted for the first time.
- When the recording mode on the playback tape is switched from SP to EP and back again.
- When the picture is distorted by scratches on the tape.
- When TRACKING AUTO:ON is selected in the Tracking menu after the picture is adjusted automatically.

If auto tracking does not work, the tracking was probably last adjusted manually.

### Adjusting the tracking manually during playback

When the playback picture proves to have streaks or snow during normal playback, Still picture or Slow picture, adjust the picture manually using the Tracking menu. Press either  $\Delta+$  or  $\nabla-$  to select TRACKING ADJUST in Tracking menu to obtain the best possible picture. Press RETURN and adjust by pressing  $\Delta+$  or  $\nabla-$ . When playing back a tape recorded on another VCR, the tracking condition is automatically adjusted on this VCR.

### Notes

- Auto tracking adjustment may be impossible when the recording condition of the tape is poor.
- During auto tracking adjustment, streaks or noise may appear.

## Playing Back a Video Tape

### Using COUNTER/REMAIN

To display the counter, press COUNTER /REMAIN once.

The tape counter shows the tape travel time in hours, minutes and seconds during recording or playback.

#### Note

For seeing the remaining tape time, first check the tape mode.

If you want to see the remaining tape time in T-120, press RETURN then  $\Delta$ + or  $\nabla$ - until T-120 appears in TAPE REMAIN screen. For OTHERS, press the button until OTHERS appears.

To see the remaining tape time during recording or playback, press COUNTER/REMAIN twice.

The remaining tape time appears with "REM."

### Using Counter Memory Function

The counter memory makes it easy to return to a particular spot on the tape after recording or playback. The tape stops when the counter reaches SP 0:00:00. This feature is especially helpful when editing a recording.

- 1 Press COUNTER/REMAIN to see the counter.
- 2 Start recording or playback, and press COUNTER RESET at the point you want to return to.  
*The counter displays SP 0:00:00.*
- 3 Press STOP ■ when you finish recording or playing the tape.
- 4 Press REWIND/REVIEW ◀◀.  
*The tape stops at SP 0:00:00.*
- 5 Press PLAY ▶ to play the tape.

# Recording TV Programs

## Recording TV Programs

### Caution

Television programs, films, video tapes and other materials may be copyrighted. Unauthorized recording of such material may be contrary to the provisions of the copyright laws. Also, use of this recorder with cable television transmission and/or program owner.

RM-Y138/W

- 1** Insert a cassette with the safety tab.  
The VIDEO TV turns on automatically (Auto power on).
- 2** Select the recording tape speed, SP or EP, with TAPE SPEED.
- 3** Select the channel to be recorded with CH +/- or 0-9 buttons.
- 4** Press the two REC buttons on the Commander at the same time, or the REC button on the unit.  
*The REC indicator lights.*

### To stop recording

Press STOP ■.

### Temporarily to stop recording at a particular point

Press PAUSE || to eliminate unwanted station breaks or program material while recording a TV program.

REC || appears on the screen.

To resume recording, press PAUSE || again.

When the recording pause mode lasts for more than approximately 5 minutes, the unit enters the stop mode.

### Note

#### When the tape reaches its end

The tape rewinds to the beginning. The power will remain on.

## Recording a Program Without Watching the TV

Turn off the power of the TV.

There will be no interference with the recording.

You cannot watch another program while recording one program.

# Recording TV Programs using VCR Plus +

VCR Plus+ is a feature in SONY VCRs that simplifies the task of programming the VIDEO TV to make timer recordings.

## How VCR Plus+ works

Whenever you want to record a TV program, all you need to do is to look up the program's "PlusCode," a number assigned to each program that's published in the TV section of most newspapers, cable TV listings, and even TV GUIDE magazine. Then, just enter the PlusCode of the program you want and the VIDEO TV is automatically programmed to record that show. It's that simple. With VCR Plus+ , you no longer have to go through a lengthy and often repetitive procedure when you set start and stop times, channel numbers, and dates. All this information is automatically sent to your VIDEO TV when you enter the program's PlusCode.

## Setting Up VCR Plus +

Setting up your VIDEO TV involves coordinating the TV channel number (the number you turn on your set to watch a program) with the guide channel number (the number that's assigned to that channel in your program guide). To get the guide channel numbers, find the "Channel Line-up Chart" in the program guide for your area that features VCR PlusCodes. It usually looks like the example on page 45.

For each channel your VIDEO TV receives, use the Channel Line-up Chart to check that the channel numbers match. For example, if HBO is listed in the Channel Line-up Chart on channel 33, and your VIDEO TV receives HBO on channel 15, you need to coordinate these numbers using the following procedure. For channels in which the numbers are the same (for example, if your VIDEO TV receives HBO on channel 33, and the guide channel number is 33), you can skip this procedure.

- 1 In main menu, press  $\Delta$ + or  $\nabla$ - to select SET VCR Plus+ CHANNELS.

- 2 Press RETURN  
The SET VCR Plus+ Channels screen appears and the GUIDE CH is highlighted.

When using a cable box, leave it on. The VIDEO TV automatically turns on, records the program and turns off.

# Timer Recording

You can preset up to six recordings up to one month in advance. The recordings can be preset with the Commander while referring to the **TIMER SET/CHECK** display on the screen.

Before you begin, check the following points.

- The date and clock must be set correctly. (See "Setting the Clock - AUTO/MANUAL CLOCK SET" on pp. 25-29.)
- Make sure that the cassette tape is long enough to record all the programs.
- Make sure that the safety tab on the cassette is not broken off.

## Recording from today to one month later

If today is August 31st, you can set the timer to record a program broadcast between today and September 30 (for 31 days). If today is January 31st, you can set the timer to record a program broadcast between today and February 28th (for 29 days). A leap year is automatically considered.

### When Preset Timer Recordings Overlap

#### If the turn-on time of two programs are the same

The program listed first on the TIMER SET/CHECK display has priority over the other programs. The timer recording of lower priority programs will be done from the point after program 1 is finished.

#### If the recording start time of program 2 is the same as the recording end time of program 1

#### If the recording start time of program 2 comes before recording of program 1 is over

The recording of program 2 will begin after program 1 is finished.

### Note

#### If a power interruption occurs

- If a power interruption lasting less than approximately three hours occurs while the VCR is waiting for the preset time, the VIDEO TV re-enter the timer recording standby mode.
- If a power interruption lasting more than approximately three hours occurs before a timer recording, the memory clears. Reset the date and time for timer recording.
- If a power interruption lasting less than approximately three hours occurs during a timer recording, the VIDEO TV starts recording again.

#### If the recording start time of the program is same as the time set with ON/OFF TIMER (pp.30-32)

- The ON/OFF TIMER has priority over the timer recording so that the timer recording will not start. In this case, set the recording start time earlier than ON/OFF TIMER and the timer recording will start.

## Checking the Timer Settings

You can display all of the timer settings on the VIDEO TV screen to check the settings.

- 1 Press **TIMER ON SCREEN**.  
The **TIMER SET/CHECK** screen appears.

# Quick Timer Recording

This function is convenient when, for example, you want to set the VCR to start recording immediately without going through the whole timer setting procedure.

## Notes

- Make sure that the clock is set correctly before you activate Quick Timer Recording.
- During Quick Timer Recording, you cannot change the channel on the VIDEO TV.

## Notes

- To extend the Quick Timer Recording time, press QUICK TIMER REC. to advance the recording time in 30-minute increments.
- To clear the Quick Timer Recording setting, press QUICK TIMER REC until time length is 0:00
- If the tape runs out during Quick Timer Recording, recording will stop and the power goes off. The tape will not rewind automatically.
- If a power interruption occurs during Quick Timer Recording, recording will stop and the power goes off. If the power interruption lasts less than three hours and the power is restored before the recording end time, recording will start again from that point.

**1** Insert a cassette. The VIDEO TV automatically turns on.

**2** Press INPUT SELECT so that a channel number appears.  
Press TAPE SPEED to select the recording speed, SP or EP.

**3** Select the desired channel number with the 0-9 buttons or CHANNEL +/-.  
If you try to select the Cable TV channel, first set CABLE to ON in SET UP menu.

**4** Press QUICK TIMER REC on the front panel.

QUICK  
TIMER REC

**5** Each time you press QUICK TIMER REC, the time length advances in 30-minute increments up to 8 hours.

QUICK  
TIMER REC

After you select the desired time length, Quick Timer Recording starts from that point.

INDEX signal marks on the tape let you scan through the start of different programs or search for a specific section of tape.

## Marking INDEX Signals

### Automatic INDEX mark

An INDEX signal is automatically marked at the beginning of recording.

### Manual INDEX mark

INDEX signals can be marked at any desired point during any recording or normal playback.

Press INDEX once.  
INDEX 00 appears.

Then press MARK at the point where you want to mark INDEX signal. INDEX MARK appears on the screen.

RM-Y138/W

### Notes

- Leave an interval of more than 2 minutes between INDEX signals when marking them one after the other so that the VCR can detect them correctly.
- While an INDEX signal is being marked during playback, the recorded sound will not be heard, but it will not be erased.
- You cannot mark an INDEX signal in the following cases:
  - On a tape without safety tab.
  - On an unrecorded portion of a tape.
  - Immediately before a point on the tape where the tape speed changes.

# Index Function

## Playing Back From the INDEX Point

The beginning of each program can be found and played back by using the INDEX signals.

**1** Insert a cassette with INDEX signals.

**2** Press INDEX once during playback.  
*INDEX 00 appears on the screen.*

**3** Press either FAST FORWARD ►► or REWIND/REVIEW ◀◀ to start the INDEX scan. The tape rewinds or rapidly advances to the next marked signal.

*The tape plays back for about 5 seconds, then rewinds or rapidly advances to the next INDEX signal. Each time INDEX signal is detected and playback begins, the INDEX scan number (INDEX SCAN 04) appears.*

**4** When the desired program is detected, press PLAY ►.  
*Playback starts from that point.*

RM-Y138/W

## Locating the Desired Program (INDEX Search)

A particular program can be located and played back by designating how many INDEX signals ahead or behind that program is from the current position.

**1** Insert a cassette with INDEX signals.

**2** Press INDEX.  
*INDEX 00 appears.*

**3** Using the 0-9 buttons, enter the number of INDEX signals you want to skip.  
For example, if the tape is at INDEX 02 and you want to locate INDEX 05, press 0 3.  
You can select maximum location by INDEX 99.

**4** Press either FAST FORWARD ►► or REWIND / REVIEW ◀◀.  
*INDEX SEARCH03 appears on the screen. When the desired signal is found, playback begins automatically.*

## Erasing INDEX Signals

You can erase unnecessary INDEX signals.

**1** Press INDEX during STOP mode.  
*INDEX 00 appears.*

**2** Press ERASE.  
*INDEX ERASE appears on the screen.*

**3** Press either FAST FORWARD ►► or REWIND / REVIEW ◀◀.  
*The first subsequent INDEX signal is erased and the tape begins playback.*

### Note

While INDEX signal is being erased, the recorded sound is temporarily muted.

# WARNING

To prevent fire or shock hazard, do not expose the unit to rain or moisture.

This symbol is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

## CAUTION:

TO PREVENT ELECTRIC SHOCK, DO NOT USE THIS POLARIZED AC PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

When using TV games, computers, and similar products with your VIDEO TV, keep the brightness and contrast functions at low settings. If a fixed (non-moving) pattern is left on the screen for long periods of time at a high brightness or contrast setting, the image can be permanently imprinted onto the screen. These types of imprints are not covered by your warranty because they are the result of misuse.

### Note to CATV system installer

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building as close to the point of cable entry as practical.

Use of this VIDEO TV receiver for other private viewing of programs broadcast on VHF or UHF or transmitted by cable companies for the use of the general public may require authorization from the broadcaster/cable company and/or program owner.

Do not use this VIDEO TV if moisture has condensed, such as on its CRT, otherwise it may cause malfunction. In this case, leave the VIDEO TV unused until it gets dry.

# Precautions

## Safety

- Operate the VIDEO TV only on 120V AC.
- One blade of the plug is wider than the other for safety purposes and will fit into the power outlet only one way. If you are unable to insert the plug fully into the outlet, contact your dealer.
- Should any liquid or solid object fall into the cabinet, unplug the VIDEO TV and have it checked by qualified personnel before operating it any further.
- Unplug the VIDEO TV from the wall outlet if you are not going to use it for several days or more. To disconnect the cord, pull it out by the plug. Never pull the cord itself.

## Installing

- To prevent internal heat build-up, do not block the ventilation openings.
- Do not install the VIDEO TV in a hot or humid place, or in a place subject to excessive dust or mechanical vibration.

## Cleaning

Clean the VIDEO TV with a soft dry cloth. Never use strong solvents such as thinner or benzene, which might damage the finish of the cabinet.

## Repacking

Keep the original carton and packing materials to use for safe transport of your VIDEO TV in the future.

If you have any questions or problems concerning your VIDEO TV, please contact your nearest Sony dealer.

This VIDEO TV receiver provides display of television closed captioning in accordance with 15.119 of the FCC rules.

## Information

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

# Introducing the Sony Trinitron® Color VIDEO TV

## About the manual

- We highly recommend that you read this manual before using your VIDEO TV combined Television and VCR. Keep the manual handy for future reference.
- The instruction in this manual are for the KV-20VM30 and KV-13VM30/31. The KV-20VM30 is used for illustration purposes.

## Features

### With the following features, you can:

- Watch up to 125 cable channels for a total of 181 possible off-air and cable channels with the **multi-band VHF/UHF/CATV tuner**.
- Enjoy 4 head high quality picture and variable speed playback.
- Set and adjusts the time automatically by using Auto Clock™ set features.
- Quickly and easily preset the VCR to record programs by using VCR plus+\* system.
- Call up on-screen menus to set timer-activated functions (Auto clock set, Manual clock set, On/Off Timer, Channel Block set), Cable on/off, AUTO Program, CH Erase/Add, Tape remain, Auto Repeat On/Off by using the **SET UP** feature.
- View the closed caption and the text by using **Caption Vision**.
- Enjoy automatic Playback by automatically playing, a cassette tape that has had its erase-protection tab removed.
- Record programs without using the program recording timer while you are away, by using the **QUICK TIMER**.
- Monitor quickly other Video/Audio sources (such as a camcorder, a video game, etc), by using the **PLAY ON™**.

\* VCR plus+ and plus code are trademarks of Gemstar Development Corporation. VCR Plus+ system is manufactured under license from Gemstar Development Corporation.

### With the supplied Remote Commander, you can:

- Use the **CHANNEL BLOCK** feature, with which picture is blocked and sound is muted, to prevent children from watching unsuitable programs.
- Switch quickly between two channels by using **JUMP**.
- Set the TV to automatically shut off after 30, 60, and 90 minutes by using the **SLEEP** timer.
- Program the VCR to make up easily to six unattended recordings within a 1-month period, including daily and weekly recordings, by using **TIMER ON-SCREEN**.
- View a slow motion during playing back, by pressing **-SLOW+**.
- View a picture frame by frame during PAUSE/STILL picture, by pressing **FRAME**.
- Playback pictures in twice speeds by pressing **X2**.
- View a single frame by using **PAUSE**.
- Make sections of tape so you can quickly and easily return to the section you want to watch, by using **INDEX** and **MARK**.

#### WARNING

Batteries may explode if mistreated. Do not recharge, disassemble, or dispose of in fire.

### Instalilling Battery

- 1 Remove the battery compartment cover (Rear of commander).

- 2 Insert one AA Battery (R6) being careful of the correct polarity.

#### Battery life

Under normal operation, the battery will last up to a half of year. If the Remote Commander does not operate properly, the battery might be exhausted. Replace it with new one.

#### To avoid damage from possible battery leakage

Remove the battery if you do not plan to use the Remote Commander for a fairly long time.

# Connecting TV Antenna/Cable

Although you can use either an indoor or outdoor antenna with the VIDEO TV, an outdoor antenna will provide you with better picture quality. You can receive cable TV by connecting a cable supplied by your local cable company.

## Connecting VHF, UHF or VHF/UHF Combination Antenna, or CATV Cable

### 75-ohm coaxial cable (round)

- 1 Check your antenna cable type and prepare the end of the cable using the F-type connector.

Attach an F-type connector (not supplied).

- 2 Plug the connector into the VHF/UHF terminal at the rear of the VIDEO TV.

### 300-ohm twin-lead cable (flat)

- 1 Check your antenna cable type and prepare the end of the cable using the 300-ohm twin-lead cable.

Attach the supplied antenna connector.

Loosen both screws on the connector with a screwdriver.

Attach the cable and tighten both screws with a screwdriver.

- 2 Plug the connector into the VHF/UHF terminal at the rear of the VIDEO TV.

\* Most combination antennas are equipped with a signal splitter. Remove the splitter and attach the appropriate connector.

## Connecting Both VHF and UHF Antennas

Use the EAC-66 U/V mixer (not supplied).

- 1** Prepare the VHF antenna end using the appropriate connector (p. 8).
- 2** Connect the cables to the mixer.
- 3** Attach the mixer to the VHF/UHF terminal.

### When the U/V mixer is used

Snow and noise may appear in the pictures when viewing cable TV channels over 37 (W + 1).

### Note

For better picture quality, we would recommend you to connect an outdoor antenna.

# Using the Timer-Activated Functions

## Setting the Clock - AUTO CLOCK SET

RM-Y138/W

### Notes

- The clock cannot be set automatically if you don't receive a channel that carries a time signal in your area. If so, set the clock manually (pp28-29).
- If there are only a few channels in your area that carry time signals, setting the clock automatically may take up to about 30 minutes. If nothing happens even after you wait about 30 minutes, set the clock manually.
- The menu disappears automatically if you don't proceed for more than one minute.

Before you use the timer feature for recording program, you need to set the current time and date.

Some TV and cable channels have started to transmit time signals with their broadcasts. Your VIDEO TV can pick up this time signal to automatically set the clock. After completing the steps below, when you turn off the VIDEO TV, it will automatically search for a channel that carries a time signal and set the clock. The Auto Clock Set feature only works if a channel in your area is broadcasting a time signal. If broadcasters in your area are not yet sending time signals, set the time manually (PP28 - 29).

Clock setting is necessary also to use ON/OFF TIMER, CHANNEL BLOCK, Timer Recording and VCR Plus Recording.

#### 7 To activate the Auto Clock Set function, turn the TV off.

#### Notes

- If **AUTO CLOCK** has been set when you turn the VIDEO TV on, the display will appear as shown right. When the display does not appear as shown right even though **AUTO CLOCK** has been set: using the Manual Clock Set stops the automatic channel search when your set is power off. If the Auto Clock Set feature is not in use, the channel search is not performed when your set is power off.
- If you set the clock manually, the display will appear as shown right.

#### Notes

- Select **STANDARD**, if the **DAYLIGHT SAVING TIME** is not performed in your area.
- When you connect another VCR to the VHF/UHF antenna terminal, if VCR's tape is transmitted wrong time signal, your VIDEO TV automatically sets the clock by the time signal of the tape.

Not to set the clock by the time signal of VCR:

Turn your VIDEO TV off after having tuned VCR off or Set the clock manually on your VIDEO TV.

# Playing Back a Video Tape

## Inserting a Video Cassette

- 1 Insert a video cassette with the arrow mark facing upwards.

- 2 Gently press the center of the front side of the cassette until the mechanism draws it into the compartment.  
When the cassette has been inserted, the  / STAND BY indicator lights and the VIDEO TV turns on automatically.

### Note

When you insert a cassette without a safety tab, playback starts automatically (AUTO PLAYBACK function).

### Ejecting the cassette

Press EJECT .

You can also eject the cassette when the power is off.

### Protecting your cassette against accidental erasure

The cassette is provided with a safety tab to protect against accidental recording. Break off the safety tab with a screwdriver or other suitable tool.

If the safety tab is removed, the cassette will be ejected when you try to record on the cassette.

RM-Y138/W

Safety tab

## Playing Back a Video Tape

To record on a cassette with the safety tab broken off, simply cover the tab hole with adhesive tape.

### Maximum recording time of a tape

The quality of tape you use greatly affects record/playback quality and the life of the VIDEO TV. Use only cassette tapes that have the official VHS logo.

High-grade tapes give the best results, especially at the EP speed. They also have a better oxide coating that helps prevent dirty video heads. Although T-160 tapes offer the longest recording time, they contain thinner tape that is more likely to stretch or cause tape jams. We suggest that you use T-120 or shorter tapes.

Recording in the SP or EP mode is possible with this unit. When recording, select the desired recording mode (SP or EP) with TAPE SPEED on the Commander. During playback, the unit automatically detects the recording format, and then plays back the tape in the appropriate mode.

The following chart shows the maximum recording times for T-60, T-120 and T-160 tapes at the recording speeds as below.

Speed	T-60	T-120	T-160
SP	1 Hour (60 Minutes)	2 Hours (120 Minutes)	2 2/3 Hours (160 Minutes)
EP	3 Hours (180 Minutes)	6 Hours (360 Minutes)	8 Hours (480 Minutes)

Playing back a video tape in the LP mode is possible but recording in this mode is not possible with this unit.

## Playing Back a Prerecorded Cassette Tape

- 1 Insert a prerecorded cassette into the tape compartment. The VIDEO TV automatically turns on.

### Note

When playing back rental tapes, select NOISE REDUCTION:ON in main menu image detail improves.

- 2 If playback does not start, press PLAY ►. The tape plays back at the speed at which was recorded.

RM-Y138/W

### To stop playback

### When the tape is played back to the end

The tape is automatically rewound to the beginning (auto rewind). The power remains on.

### To rewind the tape to its beginning and to playback automatically (Auto Playback Function)

In the main menu, press △+ or ▽- to select SET UP during playback or stop mode and then press RETURN. And press △+ or ▽- to select AUTO REPEAT and then press RETURN. By using △+ or ▽-, select AUTO REPEAT to ON.

## Variable Speed Playback

You can enjoy playing back pictures in variable speeds on the VCR.

### Still Picture

During playback mode, press PAUSE ||. To resume normal playback, press PLAY ► or PAUSE ||.

### Notes

- No sound accompanies the picture, which may be unstable or have video "noise" in it. This is normal.
- If the VCR is left in the pause mode for more than about 5 minutes, the VIDEO TV will be in playback mode automatically.

## Playing Back a Video Tape

---

### To see a slow motion (Slow Picture)

Press -SLOW+ during playing back.

---

### To advance the picture frame by frame (Frame Picture)

Press FRAME **II** during Still Picture.

---

### To advance the tape rapidly

While the tape is being played back, pressing FAST FORWARD **▶▶** will move the tape forward at high speed so you can see the picture and choose where to stop. When you do this, **[▶▶]** appears on the screen.

If you release the button, the VCR will return to normal playback.

When tape is not being played back and the VCR is in the stop mode, pressing FAST FORWARD **▶▶** winds the tape forward at very high speed without displaying the picture.

When you do this, **▶▶** appears on the screen.

You can stop the forward running of the tape at any time by pressing STOP **■**.

If during the operation, the tape rewinds forward to the end, the machine will automatically stop and then rewind the tape back to the beginning again.

By pressing X2, you can now run through a tape at twice normal speed to find the exact place you want. Revert to normal speed by pressing PLAY **▶**.

---

### To rewind the tape rapidly

If you press REWIND/REVIEW **◀◀** while the tape is being played back, you can play the tape backwards to find a particular spot. When you do this, **[◀◀]** appears on the screen and the tape will be rewound at very high speed.

At the end, STOP appears on the screen and invite you to press PLAY **▶**.

## Viewing TV Programs During Tape Playback

While a tape is being played, you can switch to watching TV broadcasts.

Press STOP **■**.

The VIDEO TV returns to normal TV reception mode.

## Playing Back a Tape Recorded on Another VCR

When playing back a tape recorded on another VCR, there might be some picture noise.

Tracking ensures that the tape is correctly aligned with the playback head. It only works in the "playback" mode and its principle purpose is to minimize picture shake and what is called "noise" (fuzzy lines across the picture during playback and still picture).

RM-Y138/W

It is adjusted either automatically or manually.

### Automatic tracking adjustment function

When playback starts, the auto tracking automatically adjusts the picture. "AUTO TRACKING" flashes for 5 seconds.

The automatic tracking control is activated in the following conditions:

- When the cassette is inserted for the first time.
- When the recording mode on the playback tape is switched from SP to EP and back again.
- When the picture is distorted by scratches on the tape.
- When TRACKING AUTO:ON is selected in the Tracking menu after the picture is adjusted automatically.

If auto tracking does not work, the tracking was probably last adjusted manually.

### Adjusting the tracking manually during playback

When the playback picture proves to have streaks or snow during normal playback, Still picture or Slow picture, adjust the picture manually using the Tracking menu. Press either  $\Delta+$  or  $\nabla-$  to select TRACKING ADJUST in Tracking menu to obtain the best possible picture. Press RETURN and adjust by pressing  $\Delta+$  or  $\nabla-$ . When playing back a tape recorded on another VCR, the tracking condition is automatically adjusted on this VCR.

### Notes

- Auto tracking adjustment may be impossible when the recording condition of the tape is poor.
- During auto tracking adjustment, streaks or noise may appear.

## Playing Back a Video Tape

### Using COUNTER/REMAIN

To display the counter, press COUNTER /REMAIN once.

The tape counter shows the tape travel time in hours, minutes and seconds during recording or playback.

#### Note

For seeing the remaining tape time, first check the tape mode.

If you want to see the remaining tape time in T-120, press RETURN then  $\Delta$ + or  $\nabla$ - until T-120 appears in TAPE REMAIN screen. For OTHERS, press the button until OTHERS appears.

To see the remaining tape time during recording or playback, press COUNTER/REMAIN twice.

The remaining tape time appears with "REM."

### Using Counter Memory Function

The counter memory makes it easy to return to a particular spot on the tape after recording or playback. The tape stops when the counter reaches SP 0:00:00. This feature is especially helpful when editing a recording.

**1** Press COUNTER/REMAIN to see the counter.

**2** Start recording or playback, and press COUNTER RESET at the point you want to return to.  
*The counter displays SP 0:00:00.*

**3** Press STOP ■ when you finish recording or playing the tape.

**4** Press REWIND/REVIEW ◀◀.  
*The tape stops at SP 0:00:00.*

**5** Press PLAY ▶ to play the tape.

# Recording TV Programs

## Recording TV Programs

### Caution

Television programs, films, video tapes and other materials may be copyrighted. Unauthorized recording of such material may be contrary to the provisions of the copyright laws. Also, use of this recorder with cable television transmission and/or program owner.

RM-Y138/W

- 1** Insert a cassette with the safety tab.  
The VIDEO TV turns on automatically (Auto power on).
- 2** Select the recording tape speed, SP or EP, with TAPE SPEED.
- 3** Select the channel to be recorded with CH +/- or 0-9 buttons.
- 4** Press the two REC buttons on the Commander at the same time, or the REC button on the unit.  
*The REC indicator lights.*

### To stop recording

Press STOP ■.

### Temporarily to stop recording at a particular point

Press PAUSE ■■ to eliminate unwanted station breaks or program material while recording a TV program.

REC ■■ appears on the screen.

To resume recording, press PAUSE ■■ again.

When the recording pause mode lasts for more than approximately 5 minutes, the unit enters the stop mode.

### Note

#### When the tape reaches its end

The tape rewinds to the beginning. The power will remain on.

## Recording a Program Without Watching the TV

Turn off the power of the TV.

There will be no interference with the recording.

You cannot watch another program while recording one program.

# Recording TV Programs using VCR Plus +

VCR Plus+ is a feature in SONY VCRs that simplifies the task of programming the VIDEO TV to make timer recordings.

## How VCR Plus+ works

Whenever you want to record a TV program, all you need to do is to look up the program's "PlusCode," a number assigned to each program that's published in the TV section of most newspapers, cable TV listings, and even TV GUIDE magazine. Then, just enter the PlusCode of the program you want and the VIDEO TV is automatically programmed to record that show. It's that simple. With VCR Plus+ , you no longer have to go through a lengthy and often repetitive procedure when you set start and stop times, channel numbers, and dates. All this information is automatically sent to your VIDEO TV when you enter the program's PlusCode.

## Setting Up VCR Plus +

Setting up your VIDEO TV involves coordinating the TV channel number (the number you turn on your set to watch a program) with the guide channel number (the number that's assigned to that channel in your program guide). To get the guide channel numbers, find the "Channel Line-up Chart" in the program guide for your area that features VCR PlusCodes. It usually looks like the example on page 45.

For each channel your VIDEO TV receives, use the Channel Line-up Chart to check that the channel numbers match. For example, if HBO is listed in the Channel Line-up Chart on channel 33, and your VIDEO TV receives HBO on channel 15, you need to coordinate these numbers using the following procedure. For channels in which the numbers are the same (for example, if your VIDEO TV receives HBO on channel 33, and the guide channel number is 33), you can skip this procedure.

RM-Y138/W

# Recording TV Programs Using VCR Plus+

RM-Y138/W

## Before you start

- Check that the clock is set correctly.
- Insert a tape with its safety tab in place. Make sure the tape is longer than the total recording time.
- Turn on your VIDEO TV. When using a cable box, turn it on.

## Notes

- You cannot set VCR Plus+ in the following cases:  
When the VIDEO TV is turned off.
- The timer will not accept setting in the following cases:  
When you select Daily for a Saturday and Sunday program.  
When you select Daily or Weekly for a program more than seven days ahead.  
When you enter the PlusCode of a program that has already ended.
- If the 6 programs have already been preset, "6 PROGRAMS HAVE ALREADY BEEN SET" appears on the screen.

## Recording TV Programs

You can preset up to six programs within a one month time frame.

### 1 Press VCR Plus+ .

VCR Plus+	1/6 SAT
PlusCode [-----]	TAPE SPEED [AT]

Enter Program's PlusCode using 0-9 keys

To change tape speed push TAPE SPEED

### 2 Press 0-9 to enter the Plus Code of the program you want to preset. If you've made a mistake, press CLEAR and enter the PlusCode again.

VCR Plus+	1/6 SAT

To cancel, Push CLEAR

### 5 Press POWER to turn off the VIDEO TV.

The TIMER REC indicator lights up and the VIDEO TV stands by for recording. When using a cable box, leave it on. The VIDEO TV automatically turns on, records the program and turns off.

# Timer Recording

You can preset up to six recordings up to one month in advance. The recordings can be preset with the Commander while referring to the **TIMER SET/CHECK** display on the screen.

Before you begin, check the following points.

- The date and clock must be set correctly. (See "Setting the Clock - AUTO/MANUAL CLOCK SET" on pp. 25-29.)
- Make sure that the cassette tape is long enough to record all the programs.
- Make sure that the safety tab on the cassette is not broken off.

## Recording from today to one month later

If today is August 31st, you can set the timer to record a program broadcast between today and September 30 (for 31 days). If today is January 31st, you can set the timer to record a program broadcast between today and February 28th (for 29 days). A leap year is automatically considered.

RM-Y138/W

## Setting the Timer

**Example:** Suppose you want to record a program broadcast on channel 26 from 9:00 PM on Wednesday January 10 in EP mode. Note that 12:00 AM is midnight and 12:00 PM is noon.

- 1 Press **TIMER ON SCREEN**.

#### To preset another program

Move the cursor to the second line after step 9 and repeat steps 2 to 10.

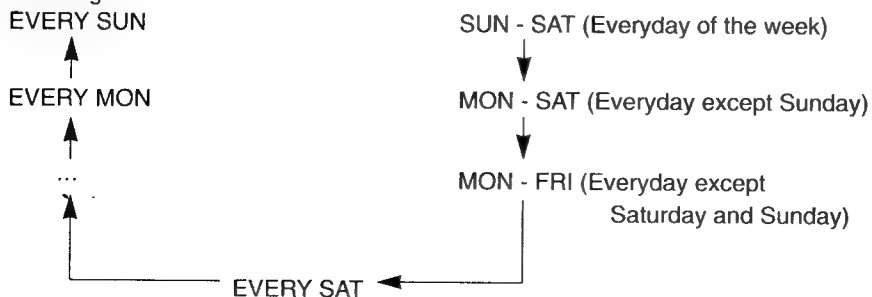

#### Daily/Weekly Recording

You can preset the timer-activated recording to the same program everyday of the week (Daily recording), or one day of the week (Weekly recording).

Follow steps 1 through 2 in "Setting the Timer" on page 47.

You can select the following programs.

Each time you press  $\nabla$ -, the indication under "DATE" on screen changes in the following order.

# Timer Recording

## When Preset Timer Recordings Overlap

### If the turn-on time of two programs are the same

The program listed first on the TIMER SET/CHECK display has priority over the other programs. The timer recording of lower priority programs will be done from the point after program 1 is finished.

### If the recording start time of program 2 is the same as the recording end time of program 1

### If the recording start time of program 2 comes before recording of program 1 is over

The recording of program 2 will begin after program 1 is finished.

RM-Y138/W

## Note

### If a power interruption occurs

- If a power interruption lasting less than approximately three hours occurs while the VCR is waiting for the preset time, the VIDEO TV re-enter the timer recording standby mode.
- If a power interruption lasting more than approximately three hours occurs before a timer recording, the memory clears. Reset the date and time for timer recording.
- If a power interruption lasting less than approximately three hours occurs during a timer recording, the VIDEO TV starts recording again.

### If the recording start time of the program is same as the time set with ON/OFF TIMER (pp.30-32)

- The ON/OFF TIMER has priority over the timer recording so that the timer recording will not start. In this case, set the recording start time earlier than ON/OFF TIMER and the timer recording will start.

## Checking the Timer Settings

You can display all of the timer settings on the VIDEO TV screen to check the settings.

- 1 Press **TIMER ON SCREEN**.  
The **TIMER SET/CHECK** screen appears.

# Quick Timer Recording

This function is convenient when, for example, you want to set the VCR to start recording immediately without going through the whole timer setting procedure.

## Notes

- Make sure that the clock is set correctly before you activate Quick Timer Recording.
- During Quick Timer Recording, you cannot change the channel on the VIDEO TV.

**1** Insert a cassette. The VIDEO TV automatically turns on.

**2** Press INPUT SELECT so that a channel number appears.  
Press TAPE SPEED to select the recording speed, SP or EP.

**3** Select the desired channel number with the 0-9 buttons or CHANNEL +/-.  
If you try to select the Cable TV channel, first set CABLE to ON in SET UP menu.

## Notes

- To extend the Quick Timer Recording time, press QUICK TIMER REC. to advance the recording time in 30-minute increments.
- To clear the Quick Timer Recording setting, press QUICK TIMER REC until time length is 0:00
- If the tape runs out during Quick Timer Recording, recording will stop and the power goes off. The tape will not rewind automatically.
- If a power interruption occurs during Quick Timer Recording, recording will stop and the power goes off. If the power interruption lasts less than three hours and the power is restored before the recording end time, recording will start again from that point.

**4** Press QUICK TIMER REC on the front panel.

QUICK  
TIMER REC

**5** Each time you press QUICK TIMER REC, the time length advances in 30-minute increments up to 8 hours.

QUICK  
TIMER REC

After you select the desired time length, Quick Timer Recording starts from that point.

INDEX signal marks on the tape let you scan through the start of different programs or search for a specific section of tape.

## Marking INDEX Signals

### Automatic INDEX mark

An INDEX signal is automatically marked at the beginning of recording.

### Manual INDEX mark

INDEX signals can be marked at any desired point during any recording or normal playback.

Press INDEX once.  
INDEX 00 appears.

Then press MARK at the point where you want to mark INDEX signal. INDEX MARK appears on the screen.

### Notes

- Leave an interval of more than 2 minutes between INDEX signals when marking them one after the other so that the VCR can detect them correctly.
- While an INDEX signal is being marked during playback, the recorded sound will not be heard, but it will not be erased.
- You cannot mark an INDEX signal in the following cases:
  - On a tape without safety tab.
  - On an unrecorded portion of a tape.
  - Immediately before a point on the tape where the tape speed changes.

# Index Function

## Playing Back From the INDEX Point

The beginning of each program can be found and played back by using the INDEX signals.

**1** Insert a cassette with INDEX signals.

**2** Press INDEX once during playback.  
*INDEX 00 appears on the screen.*

**3** Press either FAST FORWARD ►► or REWIND/REVIEW ◀◀ to start the INDEX scan. The tape rewinds or rapidly advances to the next marked signal.

*The tape plays back for about 5 seconds, then rewinds or rapidly advances to the next INDEX signal. Each time INDEX signal is detected and playback begins, the INDEX scan number (INDEX SCAN 04) appears.*

**4** When the desired program is detected, press PLAY ►.  
*Playback starts from that point.*

## Locating the Desired Program (INDEX Search)

A particular program can be located and played back by designating how many INDEX signals ahead or behind that program is from the current position.

- 1 Insert a cassette with INDEX signals.

- 2 Press INDEX.  
*INDEX 00 appears.*

- 3 Using the 0-9 buttons, enter the number of INDEX signals you want to skip.  
For example, if the tape is at INDEX 02 and you want to locate INDEX 05, press 0 3.  
You can select maximum location by INDEX 99.

- 4 Press either FAST FORWARD ►► or REWIND / REVIEW ◀◀.  
*INDEX SEARCH03 appears on the screen. When the desired signal is found, playback begins automatically.*

## Erasing INDEX Signals

You can erase unnecessary INDEX signals.

- 1 Press INDEX during STOP mode.  
*INDEX 00 appears.*

- 2 Press ERASE.  
*INDEX ERASE appears on the screen.*

- 3 Press either FAST FORWARD ►► or REWIND / REVIEW ◀◀.  
*The first subsequent INDEX signal is erased and the tape begins playback.*

### Note

While INDEX signal is being erased, the recorded sound is temporarily muted.
